

EID SENIOR STUDENTS SEMINAR SERIES

March 4 - May 27, 2011

1:00-2:00 P.M. - Fridays

Lecture Room A

Date	Name	Topic
4-March-11	Ellen Mueller	"The Role of Histamine in Helminth Infections and Allergen Specific Immunotherapy"
11-March-11	Suman Paul	"Autophagy as a regulator of T cell receptor to NF- κ B signaling"
18-March-11	Diana Riner	"Subversion of innate immune signals by <i>Schistosoma mansoni</i> permits worm development"
8-April-11	Andrew Moore	"Dynamics and infection of monocyte subsets during acute and chronic SIV infection"
15-April-11	Tonia Zangari	"The Contribution of Shiga Toxin Type to Pathogenesis of <i>E. coli</i> O157:H7"
22-April-11	Kenny Lin	"Immune cell tropisms associated with monkeypox virus infection"
29-April-11	Aura Garrison	"Crimean-Congo hemorrhagic fever virus entry"
6-May-11	Stephanie Petzing	"Characterization of the budding of Filo- and Henipavirus-like Particles in Cells from their Natural Bat Reservoir Hosts"
13-May-11	Justin Mygatt	"Human HerpesVirus-8 (HHV-8) Infection Promotes the Development of an Androgen-Independent Phenotype in the LNCAP Human Prostate Cancer Cell Line"
20-May-11	Dawn Weir	"Expression and entry tropism of the Australian Bat Lyssavirus envelope glycoprotein"
27-May-11	Deborah Steffen	"Development and Characterization of Second-generation Neutralizing Human Monoclonal Antibodies to Nipah and Hendra virus"
